

LOCKHEED MARTIN

***AN/UYQ-70 Next Generation
Mission-Essential Variant***

Examples of Data Processing Solutions

Sun Server

SPARC Ultra Axxp

Rugged HP
Next Generation
Unix Processor

Rugged NT Workstation

UPS / PDU

Energy Technologies N5 Series
Power Distribution Unit/UPS

Q-70 Mission-Essential Variant (MEV) 19" Rack Configurations

The MEV family of solutions consists of user-selected components integrated within an industry-standard 19" rack. Each user has the capability to select from a wide variety of elements that can be configured to meet unique mission requirements.

Examples of Data Processing Solutions

- Sun Server serves as basis for integration of workstations and other system servers
- Hewlett-Packard Workstation
- NT Workstation

Full Selection of HMI Devices

- Retractable Keyboard/Monitor
- Retractable Keyboard
- Fixed Bullnose can be mounted on extrusions to save rail space
- Flat Panels can be mounted on extrusions to save rail space

Isolated Rack provides environmental protection for COTS equipment

UPS/PDU Power Distribution Unit

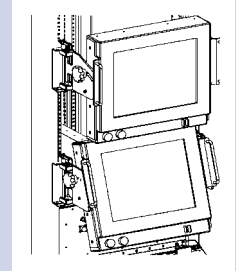

Technology Insertion

- Full technology evaluation program for all users
- Open architecture provides ease of technology insertion
